We adhere to industry best practices and conduct rigorous testing at every stage of the development process to identify and resolve any issues or bugs. Our dedication to quality ensures that you receive a flawless software solution that performs exceptionally well.
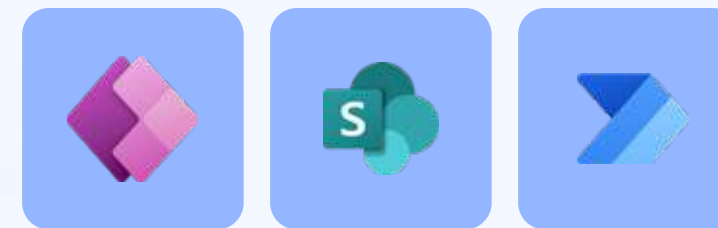

Success Story

We mainly specialize in Canvas, Model Driven & PowerApps Portals. Our database expertise includes CDS, SQL AZURE & SharePoint

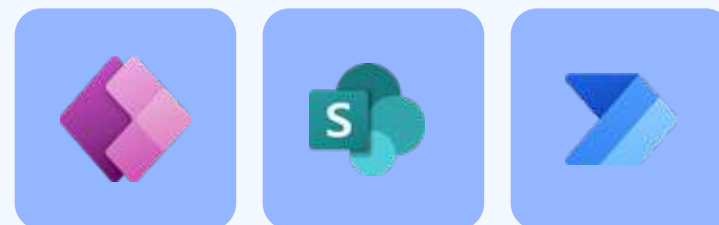

Hardware Tracker App

Hardware tracker PowerApps is designed to streamline and optimize asset management processes within organizations. Combining the convenience of mobile applications with the versatility of cloud-based technology, PowerApps empowers businesses to track and monitor their hardware assets with ease and efficiency. it is also capable to work with Offline feature.
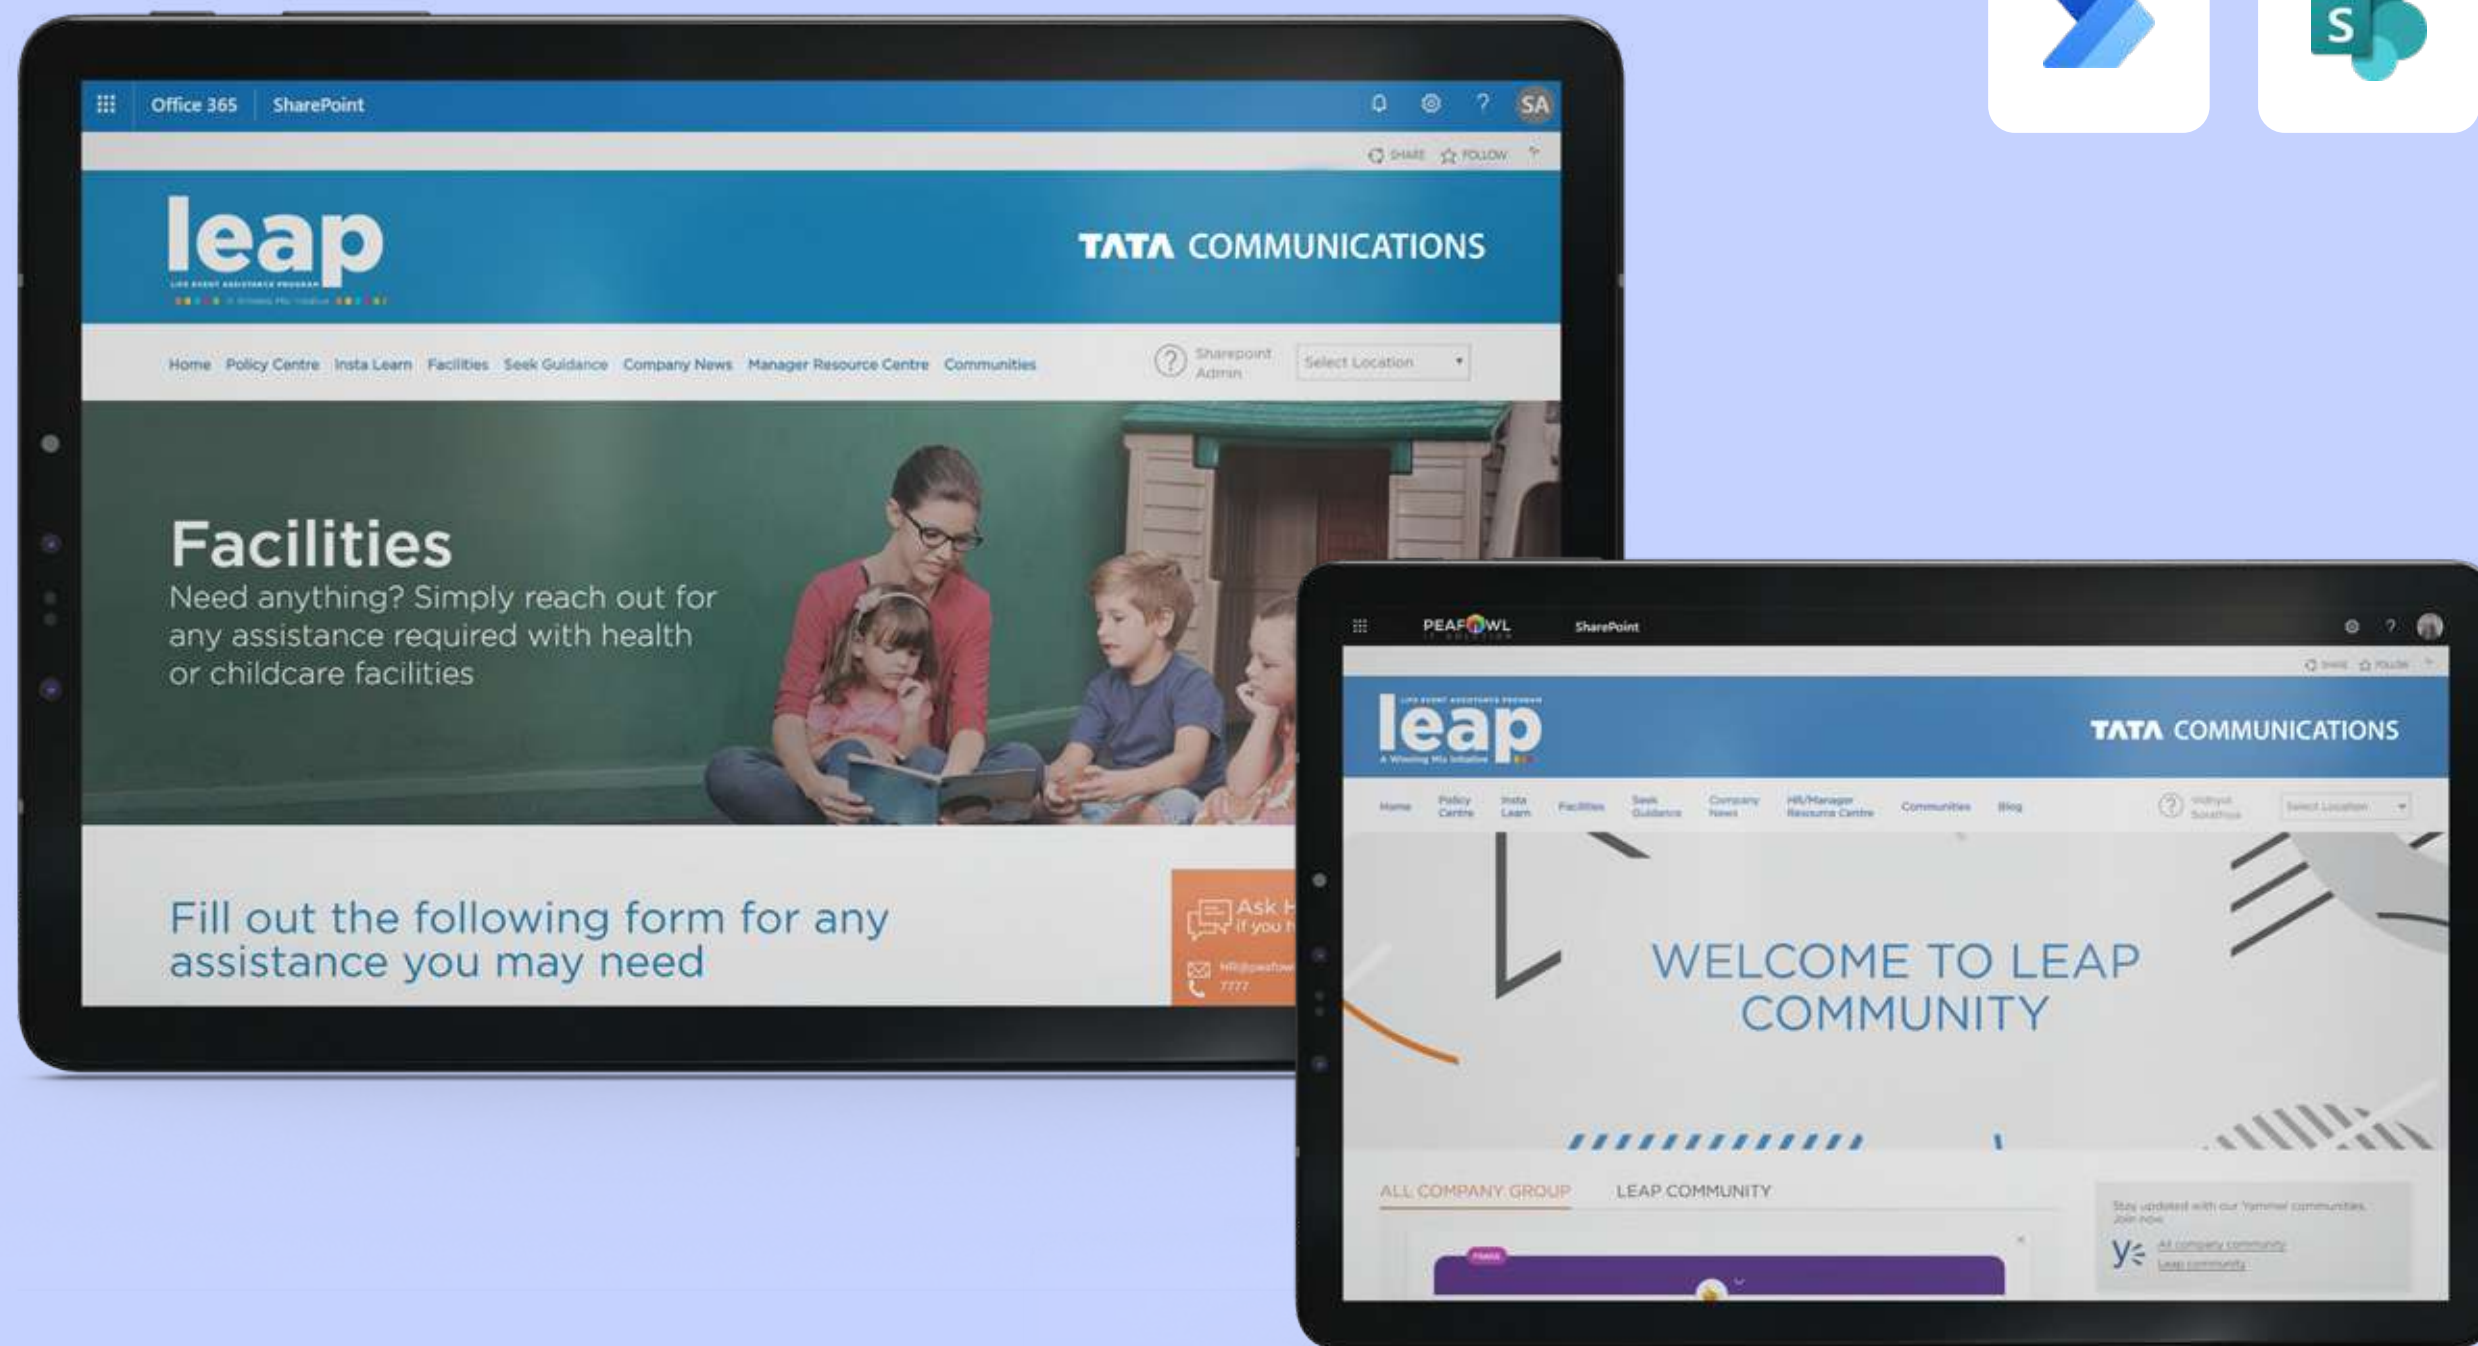

Health and Safety App

Health and Safety PowerApps is a dynamic solution designed to enhance workplace safety and compliance. The application provides a user-friendly interface that allows employees to report incidents or hazards, complete safety checklists, Near Miss records, and access important safety information.

Success Story

Our Expertise in custom SharePoint portal with branding to custom Solution and integration with Other PowerPlatform Apps

DMS and Content Management with SharePoint portal

The implementation of the SharePoint portal allowed the communication company to improve its workflow processes, making them more efficient and productive. It also provided a more secure way of storing confidential documents and content, ensuring the company remained compliant with regulations.

Since the implementation of the SharePoint portal, the company has seen a significant reduction in the amount of time spent searching for documents and collaborating on projects. The new portal has become an essential tool for the company, allowing them to focus on its core business activities.

Our Clients

Testimonials

PEAF🦚WL
IT SOLUTION

The PowerApps and SharePoint project has transformed the way Peafowl IT works, saving us time and improving our overall productivity. We can now access all our project data in one central location, and with the custom dashboards and reports, we can make data-driven decisions that help us stay on track and meet our project goals.

Overall, we are extremely pleased with the outcome of this project and would highly recommend these tools to anyone looking to improve their project management processes.
