# Testimonials

## Project: Microsoft 365 Integration

Peafowl IT Solution helped us transition from multiple disconnected tools to a fully integrated Microsoft 365 environment. With Teams, OneDrive, and Outlook working in sync, our team collaboration improved dramatically. Their support during onboarding and training was excellent. We're now more efficient and better connected, especially with remote teams.

## Project: SharePoint Modernization

We approached Peafowl IT Solution to modernize our outdated SharePoint site, and the results were amazing. They created a clean, intuitive design and added features like improved document management and secure access controls. Our employees now find it much easier to navigate and collaborate. Their professionalism and quick turnaround made the process smooth.
